This document (the “Report”) has been prepared by Renewable Energy Systems Ltd (“RES”). RES shall not be deemed to make any representation regarding the accuracy, completeness, methodology, reliability or current status of any material contained in this Report, nor does RES assume any liability with respect to any matter or information referred to or contained in the Report, except to the extent specified in (and subject to the terms and conditions of) any contract to which RES is party that relates to the Report (a “Contract”). Any person relying on the Report (a “Recipient”) does so at their own risk, and neither the Recipient nor any person to whom the Recipient provides the Report or any matter or information derived from it shall have any right or claim against RES or any of its affiliated companies in respect thereof, but without prejudice to the terms of any Contract to which the Recipient is party.

Contents

1	Introduction	1
2	Derived Background Noise Levels & Limits	1

1 Introduction

- 1.1.1 This Technical Appendix shows the measured background noise data collected at each of the survey locations detailed within **Chapter 12** for quiet daytime and night-time periods respectively and with the data filtering described within the Chapter. The corresponding daytime and night-time noise limits, derived in accordance with the recommendations of ETSU-R-97, are also shown.

2 Derived Background Noise Levels & Limits

- 2.1.1 See overleaf.
